WORK EXPERIENCE

Cloud DevOps Engineer - Work Study Bosch Rexroth AG

05/2024 - 09/2025

Deutschland

Achievements/Tasks

- Automated build and deployment of architecture diagrams to Confluence using GitHub Actions, improving documentation efficiency.
- Refactored GitHub Action workflows to improve runtime efficiency, consistency, and automation across environments.
- Developed a TypeScript Monorepo PoC, reducing code duplication and streamlining ETL application builds and deployments.
- Led the migration of ETL and backend workloads to Microsoft Azure using containerized and serverless solutions.
- Wrote Infrastructure as Code (IaC) configurations for AWS and Azure services, including Azure Container App/Jobs, MongoDB, AWS IAM, and AWS Lambda, ensuring consistent and reproducible cloud setups.
- Initiated and designed a preview environment POC to enable developers to test new features end-to-end efficiently.
- Evaluated serverless containerization vs. Kubernetes for data-intensive ETL and batch workloads as part of my Master Thesis.
- Benchmarked Azure Container App Jobs using real-world Knowledge Synchronizer applications, focusing on scalability, cold start latency, and resource utilization.
- Proposed a cloud-native deployment strategy optimizing cost, simplicity, and performance for production ETL workloads in Azure. Cloud DevOps

Cloud DevOps Engineer - Work Study ETAS GmbH

02/2023 - 04/2024

Deutschland

Achievements/Tasks

- Automated installation of developer apps via PowerShell, cutting setup time by 50%.
- Deployed an AWS EKS cluster from scratch using Terraform IaC.
- Implemented Karpenter autoscaling, improving resource use and cost efficiency.
- Built CI/CD pipeline with self-hosted GitHub Actions runners on AWS EKS.

Site Reliability Engineer Tata Consultancy Services

01/2021 - 09/2022

India

Achievements/Tasks

- Optimized AWS usage, cutting project costs by 30% with CloudHealth and AWS Cost Explorer.
- Monitored infrastructure code to ensure zero vulnerabilities and security compliance.
- Integrated Jenkins with New Relic for real-time deployment notifications and reduced downtime.

EDUCATION

Master of Science - Information Technology University of Stuttgart

10/2022 - 06/2025

GPA 2.0

TECHNICAL SKILLS

Amazon Web Services

Microsoft Azure

Docker

Kubernetes

GitHub Actions

Terraform

GitHub

Helm

Turbo MonoRepo

Minikube

YAML

Python (Intermediate)

Bash (Basics)

CI/CD

IAM

Prometheus (Basics)

Grafana (Basics)

JFrog Artifactory

Linux

Go (Basics)

AWS EKS

ArgoCD

PUBLICATION

Monitoring and Optimization of Machine Learning Workloads Using Kubernetes (07/2025)

https://link.springer.com/chapter/10.1007/978-981-96-3250-3_8#Sec8

CERTIFICATES

Infrastructure Automation with Terraform - Udemy

Microsoft Powershell - Udemy

Introduction to Programming Using Python - QSpiders

VOLUNTEERING

Vereinigung Stuttgarter Studentenwohnheime - Unterverwaltung (07/2025 - Present)

Subletting Tutor

LANGUAGES

Deutsch - A2

Limited Working Proficiency

English - C1

Full Professional Proficiency
